## Freestanding Feet - Assembly Instructions

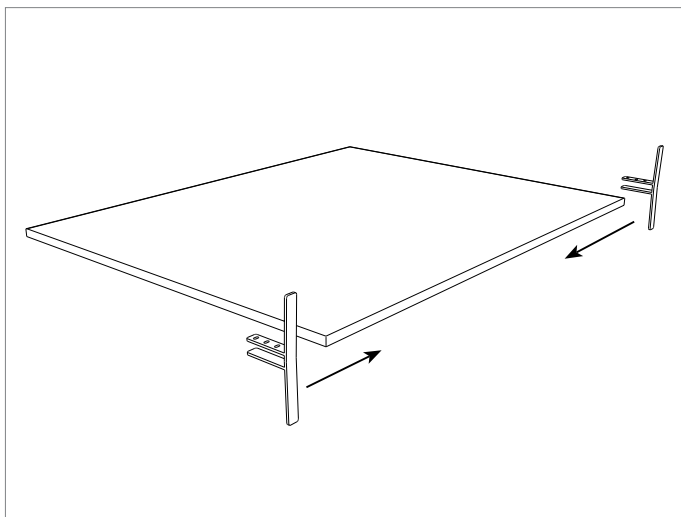

### Tools Required:

## Assembly Instructions

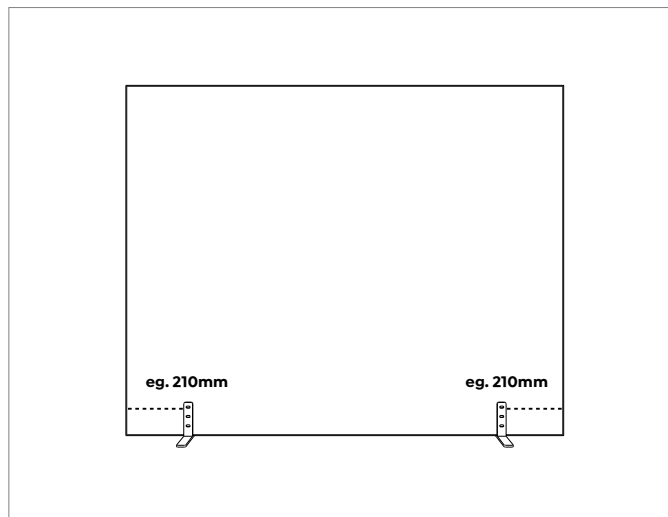

### Step 1

Lay the screen down on a flat surface (elevated if possible). Slide feet (ACT25FSF) on from the left and right side of screen.

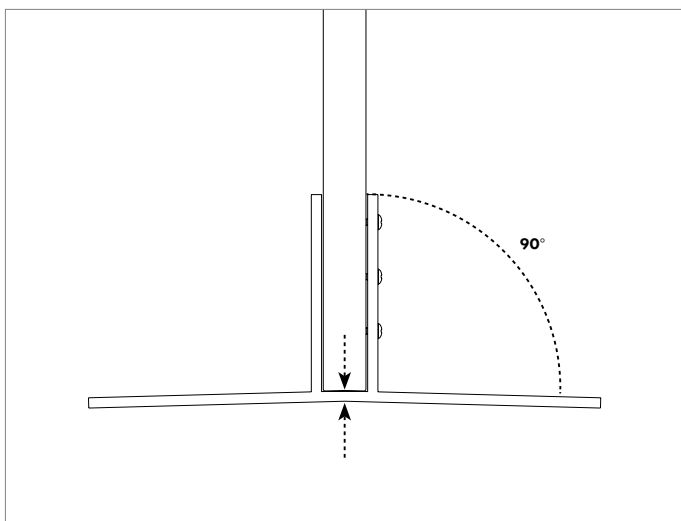

### Step 2

Measure equal distance from left and right with chosen spacing for feet. Make sure measurements allow for any desk feet or other furniture that will be close to the screen.

### Step 3

Make sure the inner groove of the feet are flush with the bottom of the screen and at 90 degrees. Using the supplied screws, fix feet to screen and tighten screws. (Please note freestanding feet do not require tee-nuts in the screen face).

### Step 4

Once feet are fixed to the screen lift screen into upright position, this may require 2 people depending on screen size.
