Assembly Instructions

No tools required.

1. Open carton and unpack all components.
2. Place chair base upright on floor, stabilising it so it does not move or slide.
3. Insert the gas lift & cover into the hole in the chair base.
4. Place the seat with mechanism onto the gas lift, ensuring the underside of the mechanism and top of the gas lift align.
5. Firmly press the seat into the gas lift.
6. Slide the plastic cover off the back bar. Slot the back bar into the opening of the mechanism.
7. Position the plastic cover over the back of the chairs mechanism. Adjust back to desired height and tighten with knob.
8. Sit on the chair to adjust the seat to the correct height and position.

Warning: Failure to follow these assembly instructions can result in product failure, personal injury or property damage.
