

Furniture at Work

2024 Catalogue New Zealand

NZ's most extensive range of workplace furniture

We are a 100% New Zealand owned company that takes pride in working closely with other New Zealand businesses to provide unique, high quality office furniture. Like many good ideas, the Knight story began in the back of a shed in 1987 as a small, father and son business. While enjoying real success over the years, we've remained true to our roots as a family business, believing in hard work, personal responsibility and old-fashioned customer service.

Today, with a dynamic team of over 40 staff, Knight Group has become an industry leader and the wholesaler of New Zealand's most extensive range of office furniture products.

We've designed, produced and delivered leading workspace solutions to New Zealand resellers for the last 35+ years.

We've learned throughout this time that it requires innovation, resources and competence. Today's workspaces are developing into being more than just an office - time doesn't stand still and nor can we afford to. Our job, as a team, is to ensure that we evolve and stay at the front of our chosen markets, thriving in a world of change.

We have a wealth of experience and a team that's passionate in helping to enhance a customer's working environment through choice, reliability and exceptional service. We have a showroom located in Auckland and a team of account managers that travel throughout the country.

Knight brings you the whole package with multiple options across seating, workstations, screens and collaboration pieces that cover all areas of a workspace, and more.

Serious Ergonomics

This is serious comfort for serious sitters.

The Knight Task Range is the fruit of years of experience, you'll feel the difference as soon as you sink into the comfort of any one of these remarkable chairs. Look for the icon for our 'Hand Built in NZ' chairs.

Standard Task Seating Features:

- ❶ **Moulded high-density seat cushion**
You'll wonder how you did without it!
- ❷ **2 or 3 lever ergonomic mechanism**
That's more adjustment for more comfort. All levers are close to the seat and within easy reach.
- ❸ **Premium quality gas springs**
We guarantee them for life – nothing worse than soggy suspension!
- ❹ **Reinforced nylon/fibreglass star bases***
These bases are extra strong and tested to 1130kg!
- ❺ **Large 60mm castors**
The extra height makes it easier to move on carpet.

Passionate about perfection

All Knight Task Seating is backed by a 15 year warranty making them ideal for a demanding office environment. Seating upholstery and cushioning in contact with the body is treated with bactericide to provide a hygienic barrier against bacteria and fungus, prolonging the life of the chair.

Enjoy the comfort of a Knight chair today!

HAND
BUILT IN
NEW
ZEALAND

Handbuilt in New Zealand
Knight Task chairs are not just another flavour of ready-to-assemble seats in a box; each chair is handbuilt to order. Components are selected from a network of reputable manufacturers worldwide.

BIFMA
BIFMA Certification focuses on safety and performance standards developed by the BIFMA Engineering Committee. The standards provide manufacturers, specifiers, and users with a common basis for evaluating safety, durability, and the structural adequacy of the specified furniture, independent of construction materials. The standards define specific tests, laboratory equipment to be used, the conditions of the test and the minimum acceptable levels to be used in evaluating these products.

AFRDI Certified
AFRDI Certification is a set of standards covering strength, durability, stability and safety. Chairs are certified to AS/NZS 4438 Level 6 (Severe Commercial Use) and are classified for high use, high abuse applications in 24 hour environments.

GreenGuard
Products that have achieved GREENGUARD Certification are scientifically proven to meet some of the world's most rigorous third-party chemical emissions standards, helping to reduce indoor air pollution and the risk of chemical exposure.

A good choice for the environment.

Eco Friendly Packaging.

As consumers become more conscious of their purchasing habits, they're looking not only for eco-friendly products. They're also concerned about sustainable business practices across the board.

Knight Group supports policies and practices to protect our environment, conserve natural resources and reduce waste. As part of Knight's ongoing product development, 2023 will see the introduction of 'Eco Friendly' packaging for all desking and storage items.

Keep an eye out for the label below as this will indicate the changeover to our new 'Eco Friendly' packaging.

E1
BOARD
CERTIFIED

E1 Board

LFE stands for Low Formaldehyde Emission and is known as "E1", an internationally recognised standard of safety for composite wood board. This certification characterises an engineered wood product that is unobjectionable for almost all intents and purposes and may be used for interior finishing and furniture.

ISO
14001
EMS

ISO 14001

ISO 14001 Certification is the international standard that specifies requirements for an effective Environmental Management System (EMS). It helps organizations improve their environmental performance through more efficient use of resources and reduction of waste.

BIFMA

BIFMA Certification focuses on safety and performance standards developed by the BIFMA Engineering Committee. The standards provide manufacturers, specifiers, and users with a common basis for evaluating safety, durability, and the structural adequacy of the specified furniture, independent of construction materials. The standards define specific tests, laboratory equipment to be used, the conditions of the test and the minimum acceptable levels to be used in evaluating these products.

AFRDI Certified

AFRDI Certification is a set of standards covering strength, durability, stability and safety (and ergonomics in the case of desks and workstations). This means that Knight are accountable for maintaining the quality of their products, submitting them for regular auditing to ensure they meet the highest standards for commercial use.

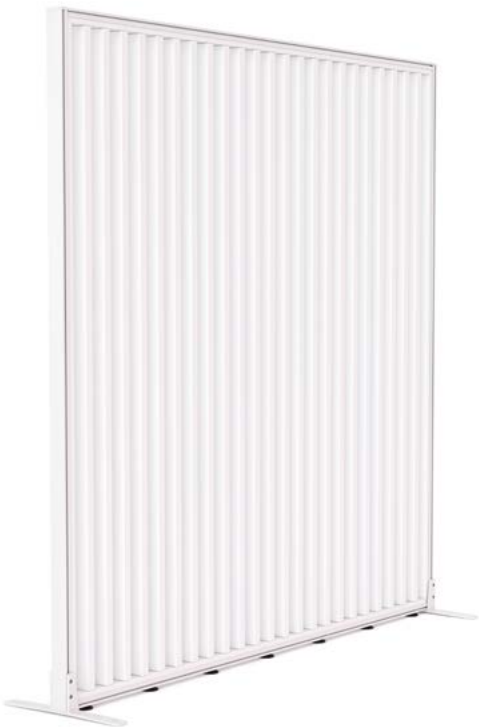

Good Wood

The manufacturer's environmental policy confirms that composite wood materials are sourced from well-managed, sustainable forests and that they hold internationally recognised forestry stewardship certification.

Introducing the new addition to our popular 50mm screen system - a sleek and stylish slat divider.

Studio Divide screens are an excellent option for dividing workspaces and providing employees with a degree of privacy in an open-plan office environment. This solution reduces distractions and increases productivity, creating functional and aesthetically pleasing workspaces that meet the needs of both employees and employers.

Divides recyclable frame is manufactured from 50mm extruded aluminium with powdercoat finish

Three standard heights 1200, 1500 or 1800mm

Five standard widths 900, 1200, 1500, 1600 or 1800mm

25mm thick slats are manufactured from E1 Board with a melamine finish and 2mm PVC edging

Freestanding feet for easy repositioning or relocating

Easy to install just add the feet

Select your degree of visibility with straight 90°, angled 30° or 150° slats

Studio Divide Screens

Studio Divide Booths

Studio Divide Meeting

Studio Divide Booths offer a comfortable and relaxed environment for socialising or completing short mobile tasks. These booths can be strategically placed to direct the flow of traffic or add visual interest to an open plan area.

Studio Divide Meeting is an ideal solution for group discussions, brainstorming sessions, and client meetings. This four-seater booth provides a semi-enclosed setting that allows for focused and productive work while still offering some privacy.

Customisation

If you're seeking a customised option, Studio Divide screens offer a range of finishes and layouts that can be tailored to your specific needs. Contact our team to discuss your ideas and receive a quote for a personalised solution that meets your unique requirements.

Studio50 is easy to lift, easy to install and quick to produce and deliver. Entirely designed and created by the Knight Group product development team. These light-weight and easy to manoeuvre partitions employ an innovative extruded-aluminium frame that effortlessly slides together and automatically locks into position.

Extruded aluminium frame finished in Black, White or Silver powdercoat.

Studio50 Freestanding

- 1200h x 900/1200/1500/1800w x 50d mm
- 1500h x 900/1200/1500*/1800*w x 50d mm
- 1800h x 900/1200/1500*/1800*w x 50d mm
- Can be used with freestanding feet, castor feet or connected with Studio50 posts.

*Requires Transom

Studio50 Desk Hung

- 900h x 1500w x 50d mm
- 900h x 1800w x 50d mm
- Brackets available based on desking range

Studio50 Agile SSD

- 870h x 1200w x 50d mm
- 870h x 1500w x 50d mm
- 870h x 1800w x 50d mm
- Compatible with Agile or Agile Pro

Studio50 Agile DSD

- 870h x 1200w x 50d mm
- 870h x 1500w x 50d mm
- 870h x 1800w x 50d mm
- Compatible with Agile or Agile Pro

Precision engineered auto-lock system

The Studio50 frame, designed in NZ by the Knight product development team, features an ingenious system that enables partitions to effortlessly slide together and automatically lock into position. By shedding many of the cumbersome components of conventional screen systems Studio50 shaves valuable minutes off each screen installation.

Quality components

Every component has been meticulously designed in New Zealand specifically for Studio50 office partitions - making them highly effective and easy to use. These cast aluminium Studio50 parts are built to last!

Light weight, industrial strength panels

The innovative combination of an aluminium frame and extruded polymer-resin foam core means Studio50 is not only extremely rigid but is also conveniently light-weight! Studio50 panels are a one person lift - making them a dream to install and re-configure.

Easily connect multiple frame heights

Because the Studio50 frame links and locks along the entire edge of the screen, you can connect any height together - without the need for any unsightly connectors!

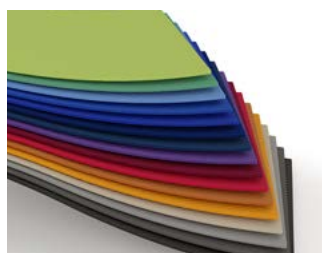

100% Recyclable frame and core

The Studio50 aluminium frame and extruded polymer-resin foam core are 100% recyclable and reusable. Aluminium can be recycled indefinitely and is also the most cost-effective material to recycle.

Pinnable surfaces

Studio50's extruded polymer-resin foam core is an ideal pinnable surface - work areas can be easily organised and personalised.

Your choice of fabric

The pinnable face of a Studio50 screen can be finished in the fabric of your choice - making it easy to add colour to your office space. The Knight Group upholstery team recommends using either plain fabrics or large random patterns.

Multiple colour options

Incorporating partitions into the overall interior design of your office is easy! Each Studio50 panel can be covered in a different fabric, and by adding a transom to your screen you are able to have two colours.

Tidy, easy-access cable tray

The hinged Studio50 cable tray is designed for quick and easy access to your power and data. Gently lever the door open - once your cables are in position simply click the door back into place.

Cable-ducts wherever you need

The generous Studio50 cable management cavity* is designed to accommodate Category 6 wiring and can be specified at any height above or below the desks at the time of manufacturing.

*Excludes CMS and data outlets.

Adjustable foot

Studio50 stands on an adjustable levelling glide with 35mm travel allowing plenty of room to work on uneven floors.

Sturdy work-surface bracket

The cast aluminium Studio50 desk bracket locks securely to the frame and can be placed at the height best suited to the user. Practically hidden from sight, the bracket is a tidy solution to a screen-hung work-surface.

- Height above desk 400mm
- Available in left and right options
- Colour: Marl Grey or Pearl Grey
- Brackets included

E-panel Tab Slide-on

- 400h x 650w x 27d mm
- Height above desk 325mm
- Colour: Dark Grey

Every workplace needs quiet space

Office pods, also known as work pods or personal workspaces, have emerged as a popular solution for creating focused and private working environments within shared spaces. Pods can help solve the dilemma of a noisy open office by providing a quiet space free of office distractions.

Pods are essentially small rooms within other rooms and offer private places where people can make phone or video calls, or simply

somewhere to work in silence. They can easily be installed and do not have the disadvantages of building additional spaces the traditional way – no building consents, disruptions, or unseen costs.

Incorporating one or multiple pods into your workspace can result in time, energy, and cost savings. They offer a straightforward means to boost efficiency and enhance team productivity.
